

The perfect blend of service and innovation.

WATER SOURCING & STRATEGIC PARTNERSHIPS

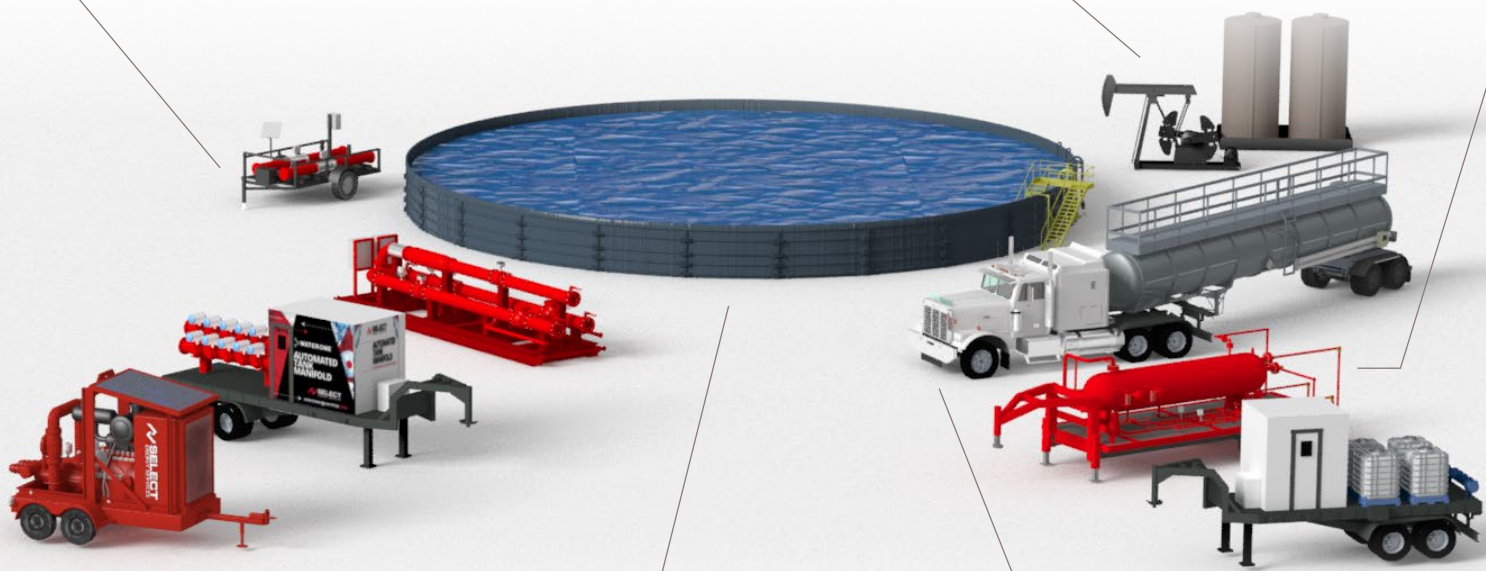

Consistent and reliable access to water sources for single or multi-operator transactions to optimize treatment and logistics.

PRODUCTION CHEMICALS & LIFE-OF-WELL SOLUTIONS

Well performance and water analysis to engineer chemical solutions that increase production and minimize disposal cost.

FLOWBACK & WELL TESTING

Specialized equipment and technical knowledge to optimize well performance, provide fluids composition data, and efficient solids recovery.

AUTOMATED WATER TRANSFER & LOGISTICS

Smart Pumps, manifolds, and blending equipment work in sync with field experts to automate water transfer operations to improve safety, efficiency and log critical data.

WATER STORAGE & ACCOMMODATIONS

The tools you need to get the job done including high-capacity storage, accommodations, remote communication and a complete line of rental equipment.

FLUID LOGISTICS & DISPOSAL

Owned fleet of fluid recovery and removal tankers providing production support with integrated dispatch and DriveCam™ technology.

COMPLETION CHEMICALS WATER TREATMENT

Designing, manufacturing and delivering innovative chemical solutions and treatment technologies that increase production and reduce our environmental footprint.
